

33rd INTERNATIONAL MEETING
OF THE
PAEDIATRIC COLORECTAL CLUB

SCIENTIFIC PROGRAM

May 17th – 19th, 2026

Marriott Vienna Hotel
Vienna, Austria

Welcome Message

Dear Colleagues and Friends,

It gives us great pleasure to welcome you to the 33rd International Meeting of the Paediatric Colorectal Club, taking place at the Marriott Vienna Hotel in Vienna from 17th to 19th May 2026.

Vienna's charm lies in the seamless blend of Baroque majesty and contemporary creativity. The city offers an unforgettable blend of imperial grandeur, artistic richness, and vibrant contemporary charm — a perfect backdrop for our international gathering.

Diseases of the colon and rectum in children such as anorectal malformations, Hirschsprung's disease, inflammatory bowel disease, idiopathic constipation and fecal incontinence present a special challenge to pediatric surgeons. Many of these diseases have a major impact on quality of life and warrant long-term follow-up and treatment into adulthood. To provide the best medical and surgical care to children with colorectal diseases, it is essential that we have the highest possible standards of education, training and research.

The International Meeting of the Pediatric Colorectal Club represents the most important annual event for all pediatric surgeons who take care of infants and children with colorectal disorders. The 33rd International Meeting of the Pediatric Colorectal Club aims to provide up-to-date clinical and scientific information on all aspects of pediatric colorectal diseases and malformations to practicing pediatric surgeons, pediatric urologists, pediatricians, pediatric gastroenterologists, nurses and patient support groups.

We hope that many of you will be able to stay longer and participate in the EUPSA, ESPES, & IPEG Joint Congress, which will also take place in Vienna from 20th to 23rd May 2026.

<p>Valeria Solari Local Organizing Chairperson</p>	<p>Prem Puri Chairman, Scientific Committee</p>
